

**Austrian Insane Over War.**—An Austrian residing in Vittá, Man., has gone insane from brooding over the war. Yesterday insanity papers were issued for his commitment to an asylum by Magistrate Bonnycastle. It was stated that the man talks wildly about fighting, walks about daytimes with eyes glaring and muttering to himself, and that at night he frequently bounces from his bed, jumps out of the window, and, picking up a stick, charges about the lawn in front of his home. His neighbors have become frightened at his actions and one of them yesterday had the insanity papers issued.
