

# EMPLOY ALIEN ENEMIES

---

## Men Will be Put to Work Clearing Land.

---

Arrangements for the interning of alien enemies on the lines of the plan recently adopted are being successfully advanced by General Sir William Otter. In a few days it is expected, a start will be made in the removal of the Quebec registered aliens who are public charges to the Abjibi district. General Otter is co-operating in the matter with the Quebec Conservation Commission.

As far as Ontario is concerned, part of the aliens will be put in the Algonquin National Park and a number employed at the central training ground at Petawawa. Far from objecting to go, the reports indicate an entire willingness on the part of the great majority of the aliens to be interned, with winter facing them and no employment being in progress. If the land in Quebec which they clear is agriculturally suitable a considerable number of them are expected to establish homesteads.
