

CHATEAU LAURIER DISMISSES GERMANS

Foreigners Given Full Time in Corporation Work—Canadian Laid Off Says Business Man.

Ottawa, May 13. — This morning four Germans were discharged from the employ of the Chateau Laurier. The men were all heads of departments, one in the dining room, one in the grill room and two downstairs.

Public sentiment since the sinking of the Lusitania has started a demand for the discharge of all Germans and Austrians.

There is considerable talk on the street today of the large numbers of Germans who hold responsible positions in the service of the company while Canadians walk the streets looking for work. These citizens call attention that a German by birth holds a responsible position in a department connected with the national defence.

In New Edinburgh.

Germans and Austrians are being employed on corporation work, was the statement of a prominent business man this morning. He claimed that foreigners were on full time and that when men had to be laid off it was Canadians who were discharged. It is understood that the corporation gangs referred to are in New Edinburgh.

Later in the day it was learned that several more Germans had been dismissed, and that it was the intention to dismiss all the German help shortly.
