

# WARE PRAIRIE FIRES

Winnipeg, Aug. 16—Military authorities of District No. Ten desire the press to give warning to farmers this season of the danger of prairie fires, due possibly to incendiarism on the part of alien enemies.

Troops are being dispatched from military camps to take their share in the harvesting. Some of these may have had very little experience in agricultural work, so it is essential on this account also to see that proper precautions are taken. In appealing for extra precautions, the military authorities point out that already two serious prairie fires have been reported within 150 miles of Winnipeg.
