

"Kultur" Goes Free.

London Advocate.

The Windsor Record points out that while Lefler, the dynamiter, has started to serve his ten-year sentence at Kingston, the real criminal, a "kultured" German-American of Detroit, named Albert Kaltschmidt, is still at large. This treacherous, slimy intriguist sought to "punish" Canadians for sending soldiers to the front to resist the barbarism of the Kaiser.

The Record suggests that every effort should be made to extradite this fanatic, the same type no doubt that furnished Meunter with his dynamite and revolvers. He is the type of German who sits in his office and hires assassins to do his bidding. He would have been the chief boss of the dagger workers in some early Spanish court. Canada's secret service should reach out for such a man as this. A North-West policeman has many times brought back men from the United States guilty of lesser offences. And the United States should be ashamed to harbor such a conspirator.
