

# THE FORT PRISONERS

## HAVE BEGUN GARDEN WORK INSIDE THE WALLS.

Flowers and Vegetables Operating—  
An Incinerator is Being Constructed  
Near Mont Bridge For Burning  
Of Refuse.

The prisoners-of-war at Fort Henry have commenced work with their gardens inside of the walls and already the results are apparent in the number of flowers and vegetables that have sprouted. The garden is in the old location near the gateway, between the upper and lower courts.

When such splendid results can be obtained with the little earth that can be obtained inside of the walls of the lower court of Fort Henry, the gardens that will be made outside of the fort on the slope facing the Royal Military College can be imagined.

In Germany, intensive cultivation is down to a fine art and the prisoners are using the Fatherland methods.

The prisoners are planning to have a good baseball league of two teams organized as soon as the outdoor exercise ground is opened for them.

An incinerator is now being constructed near the mont bridge for the burning of the refuse from the prison camp.
