

ALIENS TO GO TO MINES.

**Canadian Government Will Make
Them Dig Coal.**

Special to The Star.

Ottawa, May 29.—Owing to the requirements of coal mining and pulp companies in Nova Scotia, Alberta, and British Columbia it has been decided to release approximately one thousand interned aliens. These are men who were interned at the beginning of the war more on account of their inability to make a living than because of any hostile intentions on their part. Instead of continuing to be an expense to the country, they will henceforth contribute to its industrial welfare.
