

# PEACE WILL COME IN 1920, ASSERTS WINNIPEG SEERESS

## Mme. Karo Sees Crop Failure All Over World and Famine Peril

"Peace will not come until 1920, although 1919 will see the beginning of the end of the downfall of Germany.

"There will be extensive crop failures all over the world this year.

"Autocratic monarchs are tottering on their thrones. All will be overthrown in the next few years.

"Canada faces a great danger from a terror campaign by German agents if the United States enters the war."

These are the principal items in a prediction made recently by Mme. Karo, clairvoyant and seeress.

### Makes Accurate Prophecy

Mme. Karo, who made her predictions Monday of this week, foretold trouble for the United States with Central American nations. Friday, German influence was discovered to be at work in Central America, attempting to stir up trouble against the American nation. Mme. Karo sees Central America as a submarine base for Germany, which will menace American shipping in the South Atlantic.

"When the United States gets into this war agents of the Kaiser will destroy grain elevators and other places where food supplies are stored," said Mme. Karo. "Coal and other supplies necessary to the industries will be destroyed. Canadians as well as the United States will suffer. I see great loss of life in the harbors, for it is from the water which the United States and Canada have to fear. There will be great loss when the grain is collected, for much of it will be destroyed by alien enemies.

### Sees End of Autocrats

"The time is fast approaching when autocratic kings will disappear from Europe. By this I do not mean constitutional monarchs like King George, with whom the British royal house is now blessed. The army of the Lord is the great free army of the British Empire.

"The crops of 1917 will be almost a complete failure all over the world. In Western Canada and the Western States rust will do great damage. I see one particular line running northeasterly through Western Canada which will suffer more from rust than any other section. People should take warning and plant all the roots they can to make up for the failure of grain crops. Women must get out and help on the farms while the men must prepare for a great struggle. The worst period of all is yet to come when Canada will feel the pinch of the war in many ways. I see times of trouble ahead for this Dominion, but it will emerge from it all a greater and a better country. There should be food restrictions in Canada and the United States today for famine is coming and with it pestilence, but Western Canada will not be affected by disease."
