

RELIEF TO ALIENS

Council Will Ask to be Reimbursed by Dominion Authorities.

The question of the jitneys was again introduced into the business of the city council at last night's meeting, when a communication was received from the Winnipeg Trades and Labor council strongly urging that adequate bonds be required from the jitney service as a means of affording the public protection in case of accidents. The matter was referred to the market, license and relief committee.

The city solicitor, on motion of Ald. Simpson, seconded by Controller Puttee, was instructed to immediately take up with the department of alien enemies the question of reimbursement to the city for relief being administered by the Social Welfare commission to the destitute families of aliens sentenced on July 21 by Major Jackson, under the War Measures act, relating to enemy aliens.

Ald. Simpson, in speaking to his motion, stated that 11 families, with an aggregate of 23 persons, have been looked after by the commission, and this would probably cost \$750 for the three months in which the breadwinners were imprisoned.
