

WOULD CONSCRIPT ALIENS

Rapacity of Newcomers Seriously Interfering With Production.

WINNIPEG, Nov. 24.—Many western papers are vigorously demanding that alien labor be conscripted in Canada, especially in the western provinces, where there are so many instances of aliens refusing to perform necessary labor at anything but extortionate pay.

Three local papers have editorials today suggesting that the government might look into this aspect of the situation in the west. Daily the papers have been printing protests from citizens on the labor question, insisting that the attitude of many of the aliens in Western Canada renders conscription of them at this stage almost necessary to the good of the state.
