

**Foreign Employees of City.**—Good progress is being made on the census being taken of city employees of foreign birth. In the course of the work the names of all employees are taken and the entry opposite each shows nationality, whether naturalized or not, married or single, and the length of time in the city employ. Those not naturalized will be asked to become so at once or apply for naturalization, with an alternative of dismissal. Among the non-naturalized Austrians predominate. <sup>1</sup>
