

Work in Bush for Alien Reservists

Military Authorities at Mont- real Propose Solution of Problem

By Canadian Press.

Montreal, Oct. 28.—The military authorities have evolved a plan to deal with the large number of German and Austrian reservists here and who are regarded as a menace to the community because many of them are out of work. The military authorities think that the foreigners should be sent to the lumber camps during the winter under an armed guard. There they would be able to get food and work, while the lumber they cut could be given to the families of Canadian soldiers now fighting at the front.
