

PROTESTS AGAINST GERMANS AND AUSTRIANS

It is understood that the employment of Germans and Austrians on the Welland ship canal construction is not viewed favorably by the Port Dalhousie board of trade and that action similar to that taken by the Thorold board in protesting to the government, is likely to be taken. With such an important work, involving such heavy expenditure and also future future safety of many people, it is felt that too much care cannot be taken, especially in view of the fact that Canadians are out of work. The Merriton board met last evening to also enter a protest.
