

Alien Enemies Coming Here

It is understood that very shortly about 140 alien enemies, presently interned at Lethbridge, will go into camp with their guards "at some point" on the new automobile road.

Inquiry reveals that these men will in no wise compete with local laboring men, but that they are going to do work on the new road which the appropriation for this year could not possibly cover, and which probably could not under the circumstances be overtaken this year. Had it been otherwise, Crag and Canyon would at least have raised its voice strongly against this proceeding, but as things are, we are no means averse to the Park getting the advantage of the labor of the enemies of our country. We express the pious hope that the authorities will make them work good and hard, with long hours, and guard them well.
