

PLOT TO BLOW UP CAN- MORE MINE

Such is the rumor and which apparently was the cause of calling some twenty of the R.N.W.M.P. to the eastern coal center of the Canadian National Park last Monday, causing quite a disturbance and excitement in both Canmore and Georgetown.

Little or nothing regarding why the police were called can be learned, but the fact that this body of men do not move unless for good reason, is still a greater fact to think that there was something in the rumor.

There are still German men and families at large in both towns having lived so long in these places that they are considered more or less Canadians and while Crag and Canyon can learn nothing of an accusing nature against any of the enemies' countrymen, apparently the owners of the mines and the police are taking no chances.
