

**"FIGHT OR PAY"— Some Classes
Are Escaping Their Proper Share
of Taxation as Well, Says Corres-
pondent**

To the Editor of The Tribune:

Sir:—In your military section of the 8th inst., is an article headed as above. It gives nine reasons why we should do either. Now, sir, there is no doubt that a number of citizens are not doing one or the other. I do not refer to Canadians, Irish, Scotch, Welsh or English, but to the large number of citizens originally from Central and Eastern Europe, who claim equal rights with the Canadian and British born, but are not paying or fighting.

By the British portion doing their bit they are preserving the country for the alien.

The only way to meet this case is to do away with the voluntary system and introduce a tax, when all would have to pay.

I would like to know what others think of this.

Faithfully yours,

A. G.

King Edward, Man.
