

ALDERMEN WANT MAYOR TO CLEAN OUT ALL ALIENS

Calder, Douglas, Ramsey and Frith Make Demands On His Worship

Numerous telephone calls have been received by Mayor Henry regarding the alien enemy situation in the city. Repeatedly his worship has callers and the one question is "what are you going to do about it?"

Aldermen Calder, Douglas, Ramsey and Frith waited on the mayor this morning and they spent a sixty half hour with him discussing the German and Austrian employees of the city. It is alleged that men of German and Austrian descent are working in the power plant, operating the filtration basins of the waterworks department, acting as motormen and conductors on the street cars, working in the streets department and even in the civic block.

Following the action taken by the city of Calgary on Saturday morning, it is not unlikely that the same question will be thoroughly thrashed out on the floor of the council chamber on Tuesday afternoon. After the aldermen had thrashed the matter out with the mayor, today his worship promised to make a statement for the public, probably on Tuesday.
