

# MOVED TO DISMISS

## ALL ALIEN ENEMIES

A motion to discharge all "alien enemies" in the employ of the corporation and not to employ any till after the war, was a motion made by Ald. Muir at the waterworks committee last night. The motion, while referring to alien enemies, was aimed especially at the Germans, as very few other alien enemies are employed. Of approximately 100 men employed by the waterworks at present about 10 are Germans. One German employed in the pumphouse as an engineer, has been there about 27 years. In the summer when things are busy as many as 50 Germans are often employed.

While the committee appeared to agree with Ald. Muir, as to the desirability of getting rid of the Germans, none of the members would second the motion. The committee, however, directed the engineer to make a report on the subject to an adjourned meeting to be held tomorrow night.
