This absorption must take place ander living and working conditions that justify the last four years of sacrifice. The provision of decent living and working conditions and the other more permanent problems of reconstruction come directly under other Governmental agencies, while the Repatriation Committee is acting in close co-operation.

that a sudden transition from the former regime to the latter runs the grave danger of causing widespread unemployment.... But Canadian industry is extremely adaptable, and with careful planning on the part of Governmental agencies and sympathetic co-operation from all classes of the public, it is hoped that the extert of unemployment and the length of the period of dislocation will be reduced to a minimum."

After showing how unemployment in Canada may be caused in three ways, (1) by the return of 250,000 soldiers from overseas, (2) by the cessation of war orders and munition work and the displacing of probably 250,000 war workers and (3) public uncertainty as to the future, especially as to prices, which may cause retrenchment in purchases, the report continues.

How Can They be Absorbed.

"How can this danger of unemployment be averted? How can these discharged soldiers and displaced workers be absorbed into normal productive industry without delay or friction? This statement of the problem suggests that the problem must be a three-fold one:—

"(1) Proper distribution of employment.

"(2) Provision of employment attractionities.

friction? This stateme lem suggests that the be a three-fold one:—

"(1) Proper distribument.

"(2) Provision of opportunities.

"(3) Decent living conditions."

For the purpose of the different organity of employment and

"(3) Decent living and working conditions."
For the purpose of co-ordinating the different organizations, official and unofficial, trying to solve the problem, the Repatriation Committee was organized. The chapter on "the machinery of Repatriation," after telling of the dangers of unorganized effort, thus describes the work of the Repatriation Committee, of which Mr. H. J. Daly of Toronto, is director "The most important work of the Committee is to secure the closest possible co-operation between the different departments of the Government, at Ottawa. For this purpose a departmental co-ordinating committee has been instituted. It consists of the representatives of the various departments interested and the director's staff. Matters affecting two or more departments are discussed and recommendations as to common policy are made. This has resulted in much good in the way of greater coordination of effort and the prevention of overlapping and friction."
