

BRIDGEBURG WORRIES OVER D. S. PROSPECT

(Special Despatch to The Globe.)

Bridgeburg, March 26.—Considerable speculation is rife in Bridgeburg regarding the advancing of the clocks across the river on Sunday of one hour, in connection with the daylight saving scheme.

The fact that three of the railways here, the Michigan Central, Wabash and Pere Marquette, have already announced that the hands on their clocks will be shoved ahead one hour on Sunday, coupled with the fact that the Canadian clock will remain the same, is causing much worry at this frontier terminal. Owing to the constant communication with the cities across the border, this will result in many mix-ups in Bridgeburg and Fort Erie.

At Fort Erie, it is said, the ferry boats will operate on the American schedule. Commuters are hit hard by the fact that the clocks will be different.

There is talk, however, of passing a local by-law to change the clock here to correspond with those across the river. No decision has been reached yet, however.

CONCRETE ROAD EXPERIMENT.

**Welland County Council Will Try
Stretch Through Ridgeway.**

(Special Despatch to The Globe.)

Bridgeburg, March 26.—The Welland County Council, which recently decided to expend \$175,000 for good roads this year, has also decided to build a concrete road through the village of Ridgeway as an experiment, 16 feet wide. If this roadway meets with success, the County Council will likely build an entire concrete road through Ridgeway into Crystal Beach.

This work has been started as the result of a petition of a number of

Bertie township and Ridgeway residents. If the proposed stretch of roadway in Bertie township meets with success, it is likely that the County Council will abandon its entire program covering stone road construction.

LOYALTY CARDS FOR ALIENS.

Winnipeg, March 26.—Since the Alien Enemy Investigation Board started proceedings on January 1, 200 aliens have been granted loyalty cards and 300 refused them. J. H. Mansfield, Secretary, asserted to-day. The 300 have been classed as "undesirable citizens." Government employment agencies have been instructed to prevent them from securing jobs, Mr. Mansfield said.
