

Alien Registry.—The office of the registrar of alien enemies and the intelligence department has been moved from 112 Colony street to 74 Colony street, the house next the Assiniboine river on the west side of the street. Since the building at 112 Colony street was opened as an office in December last for the registration of aliens, no less than 14,495 have been registered. When it is pointed out that many of these have been required to report periodically at the office, and hundreds of them have visited the office to obtain permits to leave the city, it will be readily understood that more people have visited 112 Colony street than any other house in Winnipeg and probably Canada.
