

# SAYS HUNS HALT SEEDING

J. A. Bowman, provincial superintendent of immigration, today announced that he would urge the Canada food board to pass legislation to deal with Manitoba farmers who are hindering the greater production campaign.

According to Mr. Bowman, many farmers in the province of enemy alien origin, have openly announced their intention of hindering every move that would relieve the food shortage in allied countries.

"These men," asserted Mr. Bowman, "are cultivating just enough land to keep them from starving. In this way thousands of acres of choice land in the province are being wasted."

"The men are not only doing nothing themselves, but are also hindering their neighbors."

"I will ask the board to make the orders of a very drastic nature," Mr. Bowman declared. "The aliens will either have to cultivate all their available land or get off the farm and make room for more loyal subjects" he asserted.

The labor situation is growing worse daily, Mr. Bowman announced. "We have applications for help by the thousands and not half enough men in sight to fill them."
