

CRITICIZES PEMBROKE AUTHORITIES.

Renfrew Mercury: A Renfrew gentleman who was up in the Golden Lake neighborhood the other day found there a polished pro-German from the United States who was talking and preaching sedition to all who would listen; and, there being many people in that locality of German birth or descent, the fellow was never without listeners. The Renfrewite, filled with righteous indignation, lost no time about, notifying by telephone the authorities in Pembroke, but these authorities (who did not include Judge Fisher, he being absent from home) are said by the Renfrewite to have acted as though they wished no such notification to come their way. Apparently the German vote is feared, and in the north riding that vote is a considerable one, with so far no talk of disfranchisement for a time. After this let us cease to censure one Woodrow Wilson, of Washington, D. C., on the score of want of backbone in foreign policy; either that or go after certain officials in old Miramichi with a heavy club.
