

EXPERIMENTAL FARMS

IN NORTH COUNTRY

The government purposes to establish in Northern Ontario and Northern Quebec, along the line of the National Transcontinental Railway, some experimental farms, with the object of demonstrating the

value of these lands for agricultural purposes.

The question has been under consideration for some time, but has been delayed owing to the illness of Hon. Martin Burrell, minister of agriculture. However, active steps will be taken in the immediate future to select sites and prepare the work of clearing the land.

It is expected that a number of the aliens of enemy nationality, who have been interned, will be utilized for this purpose.
