

IMMIGRANTS COMING IN GREATER NUMBERS

Montreal, May .—The week which closed today has broken all previous records for European immigration to Canada. Since Monday last 22,000 people went through Montreal, of whom 9,200 were distributed from the Windsor street station alone.

If every week in the year were as good Canada's immigration would run well over the million mark per annum.

While records for Western bound Atlantic travel are being broken, those for Eastern bound travel are undergoing the same process. The Titanic disaster has certainly failed to discourage many people. The Empress sailing on Saturday for England, taking away a passenger list so large that the transportation experts are unable to explain it.
