

# TARDY ALIENS TO GET CONFINEMENT

---

After looking over the German and Austrian prisoners of war, held at Fort Osborne barracks, General Otter left for the west today to inspect similar camps at Calgary and Vancouver. He has been sent out from Ottawa that he may report to the Dominion authorities on conditions in these camps.

During the past few days several allens have been made to register. So far no steps are being taken by the authorities to compel this registration and more definite instructions are awaited from Ottawa. Those who have registered this week have done so largely on compulsion arising from complaints received at military headquarters. After being registered they have to report to Donald Macpherson, chief of police, at the city police station. Orders have been issued that should any of them fail to show up they are to be placed in confinement with the other prisoners without further ado.
