

ALIENS MUST SAW WOOD

Prisoners of War Will Be Put to Work Clearing Land.

Ottawa, Nov. 26.—Alien enemies of Britain will have to saw wood in Canada this winter to pay their board. The Ottawa Government some time ago asked both the Ontario and the Quebec governments to designate timbered areas upon the clearing of which aliens held as prisoners of war could be employed.

It is understood that the Quebec Government has set aside a considerable area in the Abitibi region to be cleared up and turned into good farms. Ontario has not yet replied.

In Western Canada the Federal Government will set prisoners of war at work improving Dominion parks.

German and Austrian prisoners thereby will be enabled to work out their anti-British spleen on good, tough Canadian stumps.

It is figured that they will earn their board, improve their health, promote public safety and improve the land.
