## Canadianized Hungarian Helps Round up Illiterate Aliens

---

Mr. J. L. Muller claims that he has made more Canadians in the last few years than anyone else in Toronto. He is an educated Hungarian and has made his money by acting as a "go-between" for the aliens in West Toronto, sending their money home for them, writing their letters, and so on. He has no love for the country of his birth and has induced all he can to let him help them take out naturalization papers. Hearing that his alien clients were liable to be interned for not reporting, he said to himself: "I have made my living by these people. I should be their friend, who have more learning than they; and should warn those who are ignorant." So he had slips typewritten with "24 Adelaide street east," and took them round from door to door in West Toronto, telling his ignorant friends of the danger of imprisonment they were running.

He went further, he had it announced from the Lithuanian pulpit that all who were not Canadians must go and tell their names to the Government. In consequence of Mr. Muller's efforts, 27 reported yesterday, a far greater number than has come to the office of the Registrar of Alien Enemies for a long time.
