

LOOK OUT FOR BOMBS

Alien Enemies Suspected of Plan to Blow up Industries—Warning is Issued.

The following circular has been sent to all public institutions in the province by Dr. R. Bruce Smith, inspector of prisons and public charities. It is presumed by the authorities that agents of alien enemies are endeavoring to place bombs in factories and institutions, by means of a harmless-looking box which is left ostensibly as a sample.

The text of the warning circular sent out by the prison inspector is as follows:—

"I am instructed to advise you that notification has been received from high authority that agents have been instructed to call on engineers and plumbers at different institutions and factories throughout the Dominion of Canada asking the institution or firm to try a lubricant of which they will leave a sample in a box.

"It is reported that this box when opened will explode with great force and do damage to persons and buildings as, instead of a lubricant, it contains a very high and powerful explosive.

"You will inform your officers, engineer and staff of this fact, and if such an agent should call at your institution offering such samples you will endeavor to have him detained and at once notify the police department and this office by telegram or telephone."
