

FERNIE INTERNES TO BE SENT HERE

Fernie, June 10.—(Special to the Herald).—The result of yesterday's round-up of aliens was 108 men here, and this morning a squad of fifty were brought down from Michel. There are 158 men in the skating rink and there will be about 200 more to come in from Michel and other outlying points.

The Conservative association here got the wives busy yesterday in an effort to have a detention camp established at Morrissey for the accommodation of the internees being gathered here, but word was received today that the men would be sent to Lettbridge and probably from there to Wainwright, where they can be put to work in the park.

Should Intern All Aliens

The miners went to work this morning, pending further investigations into the methods of internment pursued here and at other coal camps. They still insist that all alien enemies be interned regardless of whether they are heads of families or not.—

It is asserted that places vacated at Coal Creek mines by volunteers have been filled by alien enemies whilst British subjects are on the waiting list. Manager Wilson is away in St. Paul and it will be several days before he returns.
