

LEAVING WORK ON FARMS

Alien enemies to the number of a few hundred have returned to Brandon for the winter after working on farms for the summer months. There are about 1,500 on the register kept by Mr. MacChesney and of these about one-third were away for the summer.

The records of most of the men who have so far returned show that they behaved well while away from Brandon and reported themselves regularly. If they had not done this they should have been required to report oftener, perhaps weekly instead of monthly.
