

TO CONSIDER EMPLOYING ALIENS ON SEWELL ROAD

Word was received by City Clerk Brown today that the request of the city to the militia authorities at Ottawa, to allow interned aliens to work on the road between Sewell and Brandon, would be considered immediately by the department. It is expected that about one hundred or more men will be put on the work this spring and by the middle of the summer a good road will be available. This would be a very great boon to business men who have interests at Sewell while the big military camp is in progress there during the summer months.
