

PRISONERS GIVE SOME TROUBLE

First Reports Stated That Some Were Shot, But Latest Reports Say That No One Was Killed

COCHRANE, Ont., May 15.—One man dead, nine seriously wounded, several fatally, and four injured, is the result of an outbreak instigated by 300 Austrian prisoners who arrived at Kapuskasing prison camp, sixty miles west of here, on the Trans-continental railway, from Petawawa on Wednesday last under guard of 300 soldiers. The outbreak, in which the nine hundred other inmates of the camp participated, occurred on Friday, and the riot lasted several hours, as well as bring on the prisoners. General Logie, commanding the Toronto district, is in camp conducting an investigation. The new arrivals, who started the uprising, had already given considerable trouble at Petawawa, refused to go to work and turned on their guards. There was no casualties among the soldiers.

Refused to Work

Details of the riot so far known show that on Friday morning the newly arrived Austrians who had been sent from Petawawa refused to do manual labor. The leaders were taken aside by the military authorities and advised to yield but while the conference was in progress the rank and file attempted to rush the wire fence, being met by the guards with fixed bayonets. Several broke through and shots were fired at them, but most of the mutineers who were injured received their wounds at the point of the bayonet.

Major General Sir Sam Hughes last night stated that General Logie, officer commanding the Toronto military district, had left for the internment camp, where the outbreak had occurred. The militia department is awaiting his report on the occurrence.

QUIET AT KAPUSKASING

Cochrane, Ont., May 16.—Reports which have reached here today from Kapuskasing camp are to the effect that no one was killed in the trouble which was stirred up by a number of dissatisfied Austrians who were taken there from Petawawa. There have been no further reports of trouble between the prisoners and the soldiers. With the isolation of the trouble-makers, it is believed that further trouble is unlikely.
